Reviews

Durable Water Repellency The outer fabric is treated with a water repellant hydrophobic coating which forces water to bead up and roll off the surface of the fabric. It extends the saturation point of the fabric and allows you to stay comfortable and in the field longer.

RainBlocker® Technology Waterproof, windproof, breathable technology which is impermeable to outside moisture, while allowing perspiration from the inside and dispersing it through the membrane system. Garment seams are heat sealed and secured with waterproof tape.

S3™ Silver Anti-Microbial Technology S3 products utilize antimicrobial technology which helps to inhibit the growth of odor causing bacteria. S3 keeps the garment smelling fresher longer.

Tree Spider Compatible The Spider Speed Clips™ patented system allows for full system integration by securing the Tree Spider® harness into your favorite ScentBlocker® Jacket. Just attached 4 quick clips and pull the tether through the jacket slit. When it's time to hunt, simply put your jacket on, fasten your leg buckles and waist buckle, then zip up! Tree Spider® is the only product to offer this technology.
